

«Compost Tea»

In NON-CHLORINATED water, add 16 ml/l of Worm Humus/Compost and 8 ml/l of Green *Sunrise* or Healthy *Harvest* depending on the stage of development you are in. Put the products directly into the water tank or use the Lurpe Natural Solutions's tea bag. For best results add 1.5ml/l of Molasses.

Oxygenate the mixture with an air pump for 24/48 h. If you don't have non-chlorinated water, you can evaporate the chlorine by letting it rest for 48 h or with an air pump, oxygenating 2 h before making tea. If you do not have an air pump, remove the water with the product 100 times left and right twice a day. Water without filtering.

Dosage table for the compost tea elaboration	Grow				Bloom									
Week	1	2	3	4	1	2	3	4	5	6	7	8	9	10
Humus/Compost (ml/l)	8	16	16	16	16	16	16	16	16	16	16	8	Just water my friend	
 Green Sunrise (ml/l)	4	8	8	8	4	2
